Prerequisites	Music 211 or successful completion of the Music Theory Diagnostic exam.
Course description	<p>Part-writing and analysis with an emphasis on diatonic harmony and modulation in music of the eighteenth century.</p> <p>This course is the first in a 3-semester sequence in music theory taken by music majors at UCalgary. This sequence of courses is designed to help the student musician who intends to make music a career by developing musical skills and an understanding of how music is put together. These courses are called “theory” courses, but they really deal as much with the practice of music as with its theory. The first part of this course will consist of a short, intensive study of fundamentals, as well as the nature of tonal harmonic progressions. The second part will focus on using diatonic triads and seventh chords, while the third examines chromaticism. In each unit we will develop the skills to realize figured bass, harmonize melodies, and analyze music, both harmonically and formally.</p>

Course learning outcomes	By the completion of this course, successful students will be able to: 1. Be fluent in the rudiments of music theory. 2. Understand the difference between tonicization and modulation. 3. Realize diatonic and modulating figured basses in four voices. 4. Harmonize diatonic and modulating melodies. 5. Analyze excerpts and short pieces for form, harmony and cadences.
